

# Transit Series

A necessity for public transportation, the Transit Series signs provide a way to efficiently display up-to-date information for passengers on buses, trains and platforms waiting to board. An on-board processor reads the GPS location of the vehicle and, when triggered, sends the correct pre-scripted information to the sign accordingly. Our products are available in standard sizes but are also capable of adapting to any structural situation. The chassis of our Transit signs are built to withstand the abuse of transit conditions with unbeatable quality and durability demonstrated for more than 20 years with over 80,000 units sold worldwide. All Sunrise Transit Series signs are ADA compliant and are manufactured exclusively here in the USA. Sunrise Systems continues to work with many system integrators to incorporate our products into vehicle systems nationwide.

## Key features:

### PROTOCOLS:

Sunrise Systems supports Ethernet, J1587, J1708 and RS232 standard protocols as well as custom protocols.

.....

### SYSTEM INTEGRATION:

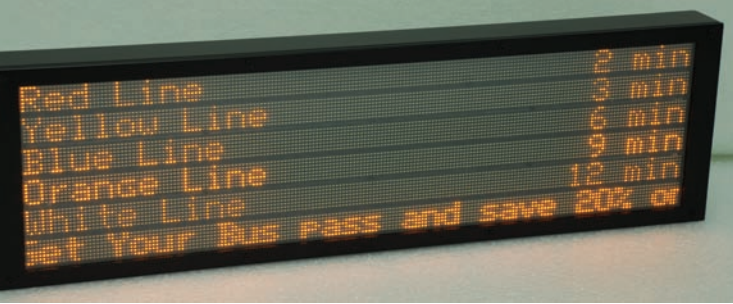

An on-board processor reads real-time information about bus location and timing to alert passengers of upcoming stops.

.....

### QUALITY AND DURABILITY:

Products are extensively tested and screened for LED conformity. Our chassis are constructed of high quality, lightweight aluminum. Custom chassis are available upon request.

## Transit Series Product Details

Three different options are available to custom-fit your transit needs. The NXTP (Next Stop) signs are internally mounted fixtures displaying current bus location and upcoming stop information. The NXB (Next Bus) signs are larger units mounted inside bus terminals or on bus platforms. The LCN panel sign is our most customizable transit product with unlimited line display options. Messages can be displayed statically or as a continuous stream and text can be flashed or made bold as a whole or in part using simple script commands.

**Length** – The NXTP and NXBS units are available in 16 or 20 character models. The LCN panel signs are customizable in height and length.

**Available Colors** – Red and amber are recommended for easier daytime viewing, but green, blue and white are also available.

**Line Display** – Single, double and multi-line models are available.

**Text-to-Speech** – Text-to-Speech modules are available with push button synchronized and asynchronous playback.

## ABOUT US

### Sunrise Systems

An industry leader since 1976, Sunrise Systems has built LED products for everyone from small businesses to major corporations. Our award-winning systems are installed in transit systems, financial institutions, malls, museums, theaters, casinos, convention halls, and ballparks worldwide. If you can imagine it, Sunrise Systems can create it – from tiny hand-held devices to soaring architectural installations with dynamic moving messages. We have the experience, the expertise and the passion to capture a vision and execute with success. Contact us today to learn how we can help get your idea up in lights.
